For Immediate Release

Pixelmetrix launches 2 Terabyte Transport Stream Recorder

IBC, Amsterdam, September 2004, booth # 1.330- Pixelmetrix is pleased to announce the latest member to its successful DVStor family with the latest model supporting 2 Terabytes on online storage.

The DVStor product line has been selling successfully into many monitoring applications since it's introduction. The solution gives the operator a simple and cost effective tool to have access to the complete MPEG-2 Transport Stream, a feature essential in detecting problems.

The DVStor family of products, depending on the version, can record from 100 GB to 2 TB. With the introduction of the DVStor 4U/2000 continuous TS recorder and player, the customer has access to anything from 5 days in a satellite environment to 10 days for terrestrial transmission.

"The DVStor family of products have been extremely successful with DVB operators in the satellite, cable as well as terrestrial environments. It gives the engineers responsible for digital transmission quality, a cost effective and simple-to-use solution. Engineers are able to study problems that have been reported but never hit the radar screen when they happened. We built the brand new 2 TB version on demand from our customers who were looking for this long term recording" says Reto Brader, GM, Pixelmetrix Europe.

About DVStation Products

DVStation, DVStation-Remote, DVStation-Pod, and DVStation-IP by Pixelmetrix are award-winning systems for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. If signal and content integrity is essential for business success, DVStation is the most advanced Preventive Monitoring solution available today.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+ and Télédiffusion de France. It is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, winner of the STAR 2000 and 2004 Superior Technology Award from TV Technology Magazine, and recipient of a Cable-Satellite/Mediacast Product of the Year Award in 2003 and 2004.
