Pixelmetrix presents its new, power packed DVStation-IP at IBC2006

IBC, Amsterdam, Booth 1.426A, September 8, 2006 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, has introduced its new DVStation-IP, an MPEG-2 test and monitoring platform, ideal for operators requiring the transmission of video and data over Internet or other IP networks.

The new, feature-rich DVStation-IP offers remote control and automation in a sleek 19-inch, 2RU rack mount enclosure. DVStation-IP provides MPEG-2 transport stream analysis and monitoring over an IP connection via a 10, 100 and 1000Mbps Ethernet port. Once connected, DVStation-IP can be set to sniff out video traffic on any set of IP address pairs, extract the MPEG-2 transport stream and perform extensive MPEG-2 verification.

Its compelling features include Live Video Display that allows visual confirmation of program content presence, Service View that spans multiple TS, displays MPEG-2 and H.264 video thumbnails, critical TS and audio/video parameters in a concise format, as well as IP input payload capability of up to 500Mbps. Key applications include a combination of real-time signal measurements and user-configurable alarm thresholds.

At the recent Beijing International Radio, TV & Film Equipment (BIRTV) Exhibition, the DVStation-IP swept the BIRTV Product of the Year Award 2006. The award committee recorded more than a hundred applications vying for top spots in the three categories – Application, Product and Technology. Distinguished review panel comprised of professional scholars, experts and eminent authorities in China. A total of five Major awards and 27 Best awards were presented to deserving innovators.

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France.

Pixelmetrix has been conferred the Peter Wayne Award for Best Design and Innovation IBC 2000, the STAR 2000 and 2004 Superior Technology Awards from TV Technology Magazine, Cable-Satellite/Mediicast Product of the Year Awards 2003 and 2004, Broadcast Engineering publication Pick Hit Award 2005 as well as the BIRTV Product of the Year Award 2006.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVStor, DVStorIP, DVStorIP-Gen, DVShift, DPI Auditor and VISUALmpeg are trademarks of Pixelmetrix Corporation.
