For Immediate Release

Pixelmetrix upgrades its DVStation Mini with QAM

IBC, Amsterdam, Booth 1.426A, September 8, 2006 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, has upgraded its DVStation Mini, a single-port version of the DVStation.

The DVStation Mini is available in an ASI version for transport stream analysis, 8VSB RF version for ATSC monitoring and now a QAM version for cable applications. It is a self-contained system that integrates all the necessary test and monitoring functions. It also allows full remote control via LAN or the Internet. The DVStation Mini is controlled using a standard personal computer with web browser or SNMP. Designed for facilities that do not require the full 21-module DVStation or 4-module DVStation-Remote, it is ideal for single source monitoring at multiple locations.

Danny Wilson, President and CEO of Pixelmetrix Corporation said, "It is our commitment to offer a complete range of tools for broadcasters of every magnitude; tools which consolidate performance and fault information from multiple sites to a single location." "Optimized for remote site deployment, this device is also powered to identify service, MPEG and RF glitches in real-time," he added.

Equipped with solid-state storage medium for portability, the DVStation Mini can provide the same level of in-depth signal monitoring and analysis as the DVStation, yet modestly priced for networks that seek cost-effective investment. Affordable and reliable, the DVStation Mini performs well without compromising on the excellent performance attributes synonymous with the DVStation.

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France.
