For Immediate Release

Pixelmetrix presents its DVStorIP-Gen for IPTV Stress Testing

October 20, 2006 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, has expanded its repertoire of IPTV service validation systems with the IPTV Test Stream Generator, DVStorIP-Gen. The DVStorIP-Gen is a high-performance, cost-effective tool for the evaluation, compliance testing and verification of networks, monitoring and equipment analysis.

The DVStorIP-Gen supports SPTS (single-program transport stream) and MPTS (multiple-program transport stream) generation, as well as UDP and RTP streaming. Each generated transport stream can be forwarded to up to 100 target IP destinations, identified by the IP address and port number.

Danny Wilson, President and CEO of Pixelmetrix Corporation elaborated, "Our DVStorIP-Gen can generate up to seven unique transport streams simultaneously. Plus the fact that it can generate up to 900Mbps of IPTV traffic, makes it an efficient solution for IPTV broadcasters as well as test and monitoring equipment and network providers."

Amongst its other unique features, the DVStorIP-Gen also allows restamping of continuity count and insertion of PCR discontinuity flag during transport stream loopback for error-free streaming.

The DVStorIP-Gen is a hard-disk based system that allows non-stop simultaneous recording of multiple channels of transmitted IP video. It allows broadcasters using Internet Protocol Television (IPTV) to verify that a specific transmission actually occurred at a given time. With DVStorIP-Gen, not only legal compliance can be sustained, but disputes can also be resolved promptly through transmission records check.

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France.

Pixelmetrix has been conferred the Peter Wayne Award for Best Design and Innovation IBC 2000, the STAR 2000 and 2004 Superior Technology Awards from TV Technology Magazine, Cable-Satellite/Mediacast Product of the Year Awards 2003 and 2004, Broadcast Engineering publication Pick Hit Award 2005 as well as the BIRTV Product of the Year Award 2006.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVStor, DVStorIP, DVStorIP-Gen, DVShift, DPI Auditor and VISUALmpeg are trademarks of Pixelmetrix Corporation.
