For Immediate Release

DVStor: A New Pixelmetrix Product Line for MPEG-TS Recording and Playback

NAB, Las Vegas, April 2003 – DVStor, direct and reliable long term storage of real-time MPEG-2 transport streams will make its NAB debut at **Pixelmetrix booth #C2233, Las Vegas, April 7-10, 2003.**

DVStor is a new product line from Pixelmetrix for MPEG-TS (Transport Stream) recording and playback. Equipped with two MPEG-ASI interfaces, the DVStor can record up to 1 Terabyte of MPEG Transport Stream and simultaneously play back. “The 1 Terabyte capacity allows customers to keep almost three days of MPEG-TS data at 50 Mbps data rate. The DVStor will be very useful for offline post analysis, as well as operational application such as time-shift broadcasting”, says Hideki Takahashi, VP of Marketing.

The DVStor can be tightly integrated with the Pixelmetrix DVStation family of Preventative Monitoring solutions. Fully synchronized to the DVStation log system, simply clicking on any error initiates full playback of this offending data. Tracking down the cause of hard to find problems – even from days ago – is now easy!

About DVStation Products

DVStation, DVStation Pod-Remote, DVStation-Pod, and DVStation-IP by Pixelmetrix are award-winning systems for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. If signal and content integrity is essential for business success, DVStation is the most advanced Preventative Monitoring solution available today.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventative Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France. It is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, and Winner of the STAR 2000 Superior Technology Award from TV Technology Magazine.
