For Immediate Release

Pixelmetrix and Harris to Jointly Demonstrate Advanced Broadcast and Monitoring Solution at NAB 2004

NAB, Las Vegas, April 2004, Central Hall 4, booth #C9146 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, and Harris Corporation, the world's leader in digital technology, will jointly demonstrate a comprehensive broadcast infrastructure and monitoring system built around the Harris NetVX[®] broadcast platform and the Pixelmetrix DVStation at NAB2004.

NetVX is a high-speed connectivity system that takes the complexity out of networking in today's hybrid environment of multiple formats, protocols, and standards. As the industry's first truly integrated networking platform for bi-directional and/or uni-directional applications, NetVX enables users to operate parallel networks and switch seamlessly between ATM, IP, or microwave links.

NetVX supports all traditional and up-and-coming transmission standards including SDI, ATM, MPEG-2 transport, ASI, and especially, the new Video-over-IP standards. This wealth of interfaces makes the Pixelmetrix DVStation a natural choice to provide comprehensive monitoring of all interfaces and video standards along side the NetVX platform.

DVStation's multitude of RF, transport, and content monitoring, as well as the advanced IP monitoring provided by DVStation-IP provide visibility of exactly what is happening inside your network. A combination of real time signal measurements with user configurable alarm thresholds and graphical display make DVStation the ideal preventive monitoring and operational troubleshooting tool.

"We recognize the great strength and flexibility of the NetVX system. Integrating DVStation into that platform is a logical step and we are excited to be working with the Harris team on this project", noted Danny Wilson, CEO of Pixelmetrix.

"Increasingly video network designs leverage the flexibility of ATM, IP and MPEG protocols resulting in hybrid scalable network designs which makes end to end performance verification increasingly important. Harris NetVX and Pixelmetrix DVStation bring together

two powerful platforms offering a solution that makes complex networking and total system performance verification simple across any network”, said John Delay, Harris Broadcast Communications director of DTV products.

DVStation and NetVX will be featured in a live demonstration at both the Pixelmetrix booth C9146 and the Harris booth C-1906.

About DVStation Products

DVStation, DVStation-Remote, DVStation-Pod, and DVStation-IP by Pixelmetrix are award-winning systems for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. If signal and content integrity is essential for business success, DVStation is the most advanced Preventive Monitoring solution available today.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France. It is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, winner of the STAR 2000 Superior Technology Award from TV Technology Magazine, and recipient of a Cable-Satellite/Mediacast Product of the Year Award in 2003. For more information, visit www.pixelmetrix.com.

For more information about DVStation and Pixelmetrix, please email info@pixelmetrix.com or visit www.pixelmetrix.com.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStor, DVShift, DVScope, and DPI Auditor are trademarks of Pixelmetrix Corporation.

About Harris Broadcast

Harris Broadcast Communications Division is one of five divisions within Harris Corporation, an international communications equipment company focused on providing *assured communications*[™] solutions for government and commercial customers in more than 150 countries. One of the world's leading suppliers of broadcast technology, Harris Broadcast Communications Division offers a full range of solutions that support the digital delivery, automation and management of audio, video and data. For more information, visit www.broadcast.harris.com.
