Pixelmetrix launches DVProbe-S2 for Comprehensive Satellite Network Monitoring

IBC Amsterdam, September 11, 2009 – Pixelmetrix, the global expert in Preventive Monitoring for digital television and IPTV networks, is launching the DVProbe-S2 at IBC this week, at booth 1B24.

The DVProbe-S2 is a monitoring probe that offers multi-standard solution for the monitoring of digital satellite transmission. It supports DVB-S2, DVB-DSNG and DVB-S modulations and H.264 SD/HD services. When combined with the DVStation-Mini PSK, this integration provides coverage monitoring and verification for narrow and broad beams.

“DVB-S2 is taking the world by storm, allowing satellite operators and users to more efficiently utilize their transponders. But that comes at the price of the significantly increased complexity of the DVB-S2 standard. The new DVProbe-S2 is there and ready to help operators through this exciting transition,” said Danny Wilson, President and CEO of Pixelmetrix.

The DVProbe-S2 also support both pilot and no pilot mode, modulation fidelity analysis via SNR and MER, constellation visualization, long-term logging of all measurements, multiple configuration profiles and round-robin scheduler for monitoring multiple transponders and multi-user remote access over LAN, internet or modem connection.

Other highlights at the booth include a slew of other newly launched products featuring the **DVStation-Mini² DVB-T**, a full-featured monitoring probe; **DVStation-Mini² QAM** for RF fidelity and TS integrity; **TSP120** for H.264 and in-depth TS analysis; **DVStor²** TS archiving platform as well as the **DVShift** for effective ethnic rebroadcast. Also showcased are the **Electronic Couch Potato™ (ECP)** for remote viewer quality monitoring and the **EndGame™** end-to-end IPTV monitoring solution.

Pixelmetrix develops a host of IPTV and Preventive Monitoring systems that offer unique attributes and versatility, allowing operators to achieve end-to-end visibility and keep tabs on their network architecture.

The IBC show will be held from September 11 to 15 at the RAI Amsterdam.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital, cable and IPTV networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service and quality of experience. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix suite of quality assurance solutions are featured as the Emmy® Award winning DVStation, DVStation-Mini, DVStation-Remote, DVStation-Pod, DVStation-IP³, DVStor, IPGen, DVShift, DVProbe-C, DVProbe-S2, DPI Auditor, EndGame, Electronic Couch Potato, Consolidator Engine, VISUALmpeg and VISUALmpeg Qualify. These are trademarks of Pixelmetrix Corporation.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+, Towercast, AT&T, Verizon, Telus, NTT and more.

Pixelmetrix has been conferred the Frost & Sullivan Industrial Technologies Award 2009, C+T Technology Development Award 2009, Engineering & Technology Emmy® Award 2007, Broadcast Engineering publication Pick Hit Award 2005 and 2008, TV Technology publication STAR Awards (Superior Technology Award Recipient) 2000, 2004 and 2007, BIRTV Product of the Year Award 2006, Cable-Satellite/Mediacast Product of the Year Awards 2003 and 2004, as well as the Peter Wayne Award 2000, for Best Design and Innovation.
