Pixelmetrix launches DVStation-Mini² QAM providing Cable 'Last-Mile' Monitoring

IBC Amsterdam, September 11, 2009 – Pixelmetrix, the global expert in Preventive Monitoring for digital television and IPTV networks, is launching the DVStation-Mini² QAM for cable operators to optimize the RF and TS integrity of their networks, at IBC this week, at booth 1B24.

The DVStation-Mini² QAM serves to monitor EdgeQAM and SDV networks, with in-depth RF and TS analysis and consolidation of all alarms into an NMS. It also provides on-air content validation, remote view of MPEG-2/MPEG-4 video/audio and service line-up checks based on NIT contents.

"The war and conflict between cable and IPTV has never been hotter. Today, customers have more choices of provider, which can result in excessive churn for cable operators. The new DVStation-Mini² QAM is an important tool in that fight, by enabling operators to both improve service quality through system tuning as well as quickly isolate fault conditions," said Danny Wilson, President and CEO of Pixelmetrix.

The DVStation-Mini² QAM also boasts H.264 video service support for services in clear thumbnailing, blackout and freeze-frame. With the optional ASI input, operators can monitor decrypted services on-site.

Other highlights at the booth include a slew of other newly launched products featuring the **DVStation-Mini² DVB-T**, a full-featured monitoring probe; **TSP120** for H.264 and in-depth TS analysis; **DVProbe-S2** for comprehensive satellite network monitoring; **DVStor²** TS archiving platform as well as the **DVShift** for effective ethnic rebroadcast. Also showcased are the **Electronic Couch Potato™ (ECP)** for remote viewer quality monitoring and the **EndGame™** end-to-end IPTV monitoring solution.

Pixelmetrix develops a host of IPTV and Preventive Monitoring systems that offer unique attributes and versatility, allowing operators to achieve end-to-end visibility and keep tabs on their network architecture.

The IBC show will be held from September 11 to 15 at the RAI Amsterdam.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital, cable and IPTV networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service and quality of experience. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix suite of quality assurance solutions are featured as the Emmy® Award winning DVStation, DVStation-Mini, DVStation-Remote, DVStation-Pod, DVStation-IP³, DVStor, IPGen, DVShift, DVProbe-C, DVProbe-S2, DPI Auditor, EndGame, Electronic Couch Potato, Consolidator Engine, VISUALmpeg and VISUALmpeg Qualify. These are trademarks of Pixelmetrix Corporation.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+, Towercast, AT&T, Verizon, Telus, NTT and more.
