Pixelmetrix launches DVStation-IP Portable **The latest tool for IPTV and Video-over-IP** **deployment**

NAB, Las Vegas, April 2005, Central Hall 4, booth #C7316 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, has launched its latest product, the DVStation-IP Portable.

The new Pixelmetrix DVStation-IP Portable is stand-alone product that can be set to sniff out video traffic on any set of IP address pairs, extract the MPEG-2 transport stream, and perform extensive MPEG-2 verification.

Its portable design means it will be useful for field trials and for operational monitoring. It will be especially useful to R&D and equipment designers and system test manufacturers.

The product comes in a handy portable package and supports 10, 100, and 1000 Mb/s Ethernet.

The DVStation-IP Portable does real-time comprehensive transport stream monitoring of:

- Bandwidth utilization
- Packet interval
- TR101-290 compliance
- PCR Jitter
- Real time transport stream decode
- Real time PSI/SI/PSIP table decode

The system supports multiple IP connections using either RTP or the defacto encapsulation. Additionally, the JOIN feature allows full verification of multicast services.

It also has configurable thresholds and alarm settings, bandwidth displayed by service name, live video display, HTML, SNMP, and CORBA remote control – all under one handle.

Says Tom Orłowski, Pixelmetrix VP Product Development: "The size and feature set of the DVStation-IP Portable makes it an essential product for field staff who need to monitor and troubleshoot video over IP networks."

About DVStation Products

DVStation, DVStation-Remote, DVStation-Pod, and DVStation-IP by Pixelmetrix are award-winning systems for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. If signal and content integrity is essential for business success, DVStation is the most advanced Preventive Monitoring solution available today.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+ and Télédiffusion de France. It is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, winner of the STAR 2000 & 2004 Superior Technology Award from TV Technology Magazine, and recipient of a Cable-Satellite/Mediacast Product of the Year Award in 2003 & 2004.
