For Immediate Release

Pixelmetrix introduces the DVStation-Mini² DVB-T, providing Comprehensive Transport Stream Analysis to ease DTV transition

NAB Las Vegas, April 20, 2009 – Pixelmetrix, the global expert in Preventive Monitoring for digital television and IPTV networks, is introducing the DVStation-Mini² DVB-T, a cost-effective TS analyzer and fully featured monitoring probe, at booth SU6007.

The DVStation-Mini² DVB-T is an extension of the DVStation-Mini line up. The DVStation-Mini² DVB-T combines high quality DVB-T RF measurements and in-depth TS analysis. It is designed for 24/7 operational monitoring and assurance of the quality and continuity of DVB-T services. The DVStation-Mini² DVB-T also offers in-depth checks of both RF and TS layers. Besides the SMPE-310/ASI port, other features include video thumbnails for H.264 video streams in SD and HD.

“It’s hard enough keeping everything running smoothly even with the financial crisis. The DVStation-Mini² DVB-T is a practical consideration for comprehensive visibility into QoS monitoring targeted at deployments on every transmitter within a DTT network topology. Operators looking to ease DTV transmission can rely on it to keep tabs on their transmitter performance,” said Danny Wilson, President and CEO of Pixelmetrix.

The DVStation-Mini² DVB-T also comes with On-air Content Validation (OCV) and DVB-H options. OCV allows automatic identify discrepancies between the expected baseline and actual broadcast content. With DVB-H, it can be used to analyze time-slice generation, DVB-H FEC and long-term performance monitoring.

Other highlights at the booth include the Emmy[®] Award winning DVStation-210, Electronic Couch Potato[™] (ECP) and Consolidator Engine[™], DVStation-IP³, DVStorIP-Gen, DVB-S.2 ASLF, DVStor, VISUALmpeg Qualify and EndGame[™].

Pixelmetrix develops a host of IPTV and Preventive Monitoring systems that offer unique attributes and versatility, allowing operators to achieve end-to-end visibility and keep tabs on their network architecture.

The NAB show will be held from April 20 to 23 at the Las Vegas Convention Center.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital, cable and IPTV networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service and quality of experience. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix suite of quality assurance solutions are featured as the Emmy® Award winning DVStation, DVStation-Mini, DVStation-Remote, DVStation-Pod, DVStation-IP³, DVStor, IPGen, DVShift, DVProbe-C, DPI Auditor, EndGame, Electronic Couch Potato, Consolidator Engine, VISUALmpeg and VISUALmpeg Qualify. These are trademarks of Pixelmetrix Corporation.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+, Towercast, AT&T, Verizon, Telus, NTT and more.
