Pixelmetrix Adds DVB-H Analyzer To Its Line of DTV Monitoring Solutions

NAB Las Vegas, April 16, 2007 – Pixelmetrix, the global expert in Preventive Monitoring for digital television and IPTV networks enhances its test and monitoring platform with the DVB-H Analyzer, at NAB 2007, Booth SU12109.

The DVB-H Analyzer works with Pixelmetrix DVStation™ family of test and measurement systems. A key feature of the DVB-H Analyzer is a graphical display of time-slicing information. Measurements such as the MPE-FEC error ratios, power saving, and burst information (bit rate, burst size, burst jitter) are also provided.

“Tech-savvy consumers today are embracing the concept of personalized television experience even on-the-go. With the proliferation of indispensable mobile gadgets such as cell phones, PDAs and compact MPEG devices, mobile operators and broadcasters need to maintain top-notch quality of service and consumer experience so as to successfully capitalize on the mass marketing of mobile TV services. Adding the DVB-H Analyzer on the plate, Pixelmetrix offers operators a one-stop shop for DTV and IPTV solutions,” said Danny Wilson, Pixelmetrix President & CEO.

With DVB-H Analyzer, the DVStation can monitor the burst transmission of DVB-H data for a specific service, rather than a complete continuous transport stream multiplex. Services can be monitored locally or remotely. Users can set various thresholds for the measured values and receive alarm notifications when signal conditions violate these set threshold levels.

“As operators start their rollout of DVB-H services, they need simple visualization tools like the Pixelmetrix DVB-H Analyzer to provide at-a-glance confirmation of complex operating parameters,” said Tom Orlowski, Pixelmetrix Vice-President, Product Development.

At the booth, Pixelmetrix will also showcase an exciting repertoire of newly launched monitoring platforms and spotlight on its Disaster Recovery, Compliance Recording and Streamlined Headend Monitoring solutions, among others.

Pixelmetrix develops a host of IPTV and Preventive Monitoring systems that offer unique attributes and versatility, allowing operators to achieve end-to-end visibility and keep tabs on their network architecture.

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP³, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutura, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+ and Télédiffusion de France.

Pixelmetrix has been conferred the Peter Wayne Award for Best Design and Innovation IBC 2000, the STAR 2000 and 2004 Superior Technology Awards from TV Technology Magazine, Cable-Satellite/Mediacast Product of the Year Awards 2003 and 2004, Broadcast Engineering publication Pick Hit Award 2005 as well as the BIRTV Product of the Year Award 2006.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP³, DVStation Mini, DVStor, DVStorIP, DVStorIP-Gen, DVShift, DPI Auditor and VISUALmpeg are trademarks of Pixelmetrix Corporation.
