For Immediate Release

Pixelmetrix to Exhibit its latest IPTV Service Validation Tools at TelcoTV 2007

Singapore, October 18, 2007 – Pixelmetrix, the global expert in Preventive Monitoring for digital television and IPTV networks, will feature its latest portfolio of IPTV Service Assurance Tools and Headend Monitoring solutions at TelcoTV Conference & Expo 2007 in Atlanta, Georgia, next week.

New at TelcoTV is Pixelmetrix **IP110**, a comprehensive solution suite for detailed MPEG over IP analysis to its award-winning DVStation-210™ and DVStation-Remote™ product family. Its unique feature includes support for End-point, Tap mode and IP forwarding. The IP forwarding allows the channeling of the selected transport stream to any remote location over the IP network for confidence monitoring.

Showcase highlights also include the recently accorded TVTechnology STAR Award, **Electronic Couch Potato™ & ECP Consolidator™**, which is designed to monitor the true customer viewing experience by providing measurements from the end point of the content delivery chain; **EndGame™ - More Than Last Mile™** surveillance system that presents a suite of true end-to-end Monitoring System for Quality of Experience; **Video Validator™** that serves as a full reference video quality analyzer of video streams; **DVStation-IP³™** - offering a one-stop monitoring engine for IP and Transport Stream Analysis, detailed service visualization and IP Headend Output verification for IPTV networks, as well as the **DVStorIP-Gen™**, an IPTV Test Stream Generator - a high-performance, cost-effective tool for the evaluation, compliance testing and verification of networks, monitoring and equipment analysis.

Pixelmetrix develops a host of IPTV and Preventive Monitoring systems that offer unique attributes and versatility, allowing operators to achieve end-to-end visibility and keep tabs on their network architecture.

TelcoTV will be held from October 23 to 25 at the Georgia World Congress Centre, Atlanta, Georgia, USA.
