Pixelmetrix premier participation at TelcoTV 2006 a success

Singapore, November 14, 2006 – Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, participated for the first time at TelcoTV 2006 which took place last week, from November 6 to 8, in Dallas, Texas. At the show, Pixelmetrix featured its latest DVStorIP-Gen for IPTV Stress Testing and DVStation-IP for IPTV Quality of Service monitoring.

Danny Wilson, Pixelmetrix President and CEO related, “TelcoTV focused on US telcos deploying IPTV services. The event proved to be an excellent platform for us to highlight our latest IPTV service validation tools. Ever since IPTV became the inevitable conversation piece, a great deal of concerted effort has been put in to achieve better management and monitoring through improved end-to-end integration.”

“Participating in tradeshow such as TelcoTV where we know majority of the players are, also allows us to observe closely the outlook on market sentiments. We have reserved a booth for next year’s show and looking forward to it,” he added.

TelcoTV 2007 is scheduled to be held from October 23 to 25, 2007, in Atlanta, Georgia.

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.
