For Immediate Release

Pixelmetrix to Demonstrate DVB-C interface module for DVStation at NAB2003

NAB, Las Vegas, April 2003 – Pixelmetrix, the global expert in Preventative Monitoring for digital television networks, will demonstrate a new DVB-C QAM interface module for its DVStation at **Pixelmetrix booth #C2233, Las Vegas, April 7-10, 2003.**

The QAM interface module provides real time RF monitoring of key RF performance parameters according to ITU-J.83 Annex A (DVB-C). Full support is provided for constellation display of QAM16 through QAM256.

The module includes a full QAM DVB-C demodulator meaning the full power of DVStation's MPEG-2 Transport Stream and Automatic On-air Content Validation™ can be combined with RF monitoring within a single unit.

Available for both the 21-slot flagship DVStation platform and the 4-port DVStation-Remote system, the new product is fully compatible with other Pixelmetrix interfaces including QPSK, DVB-T/COFDM, and ASI. The combination of different interfaces within a single chassis provides cable operators full visibility of their operations – from initial acquisition of program content, encoding and multiplexing, and finally, to delivery to the cable plant or headend.

Both DVStation and DVStation-Remote offer full control from any number of remote locations over a WAN network using a standard web browser, VNC or X-Window client, or SNMP network management system.

About DVStation Products

DVStation, DVStation Pod-Remote, DVStation-Pod, and DVStation-IP by Pixelmetrix are award-winning systems for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. If signal and content integrity is essential for business success, DVStation is the most advanced Preventative Monitoring solution available today.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventative Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+ and Télédiffusion de France. It is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, and Winner of the STAR 2000 Superior Technology Award from TV Technology Magazine.
