For Immediate Release

Pixelmetrix's DVStation Passes Key SARFT Test

BIRTV, Beijing, August 2005, Booth 7010 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, announced that China's Metrology and Test Center of Radio and Television under the State Administration of Radio, Film and Television (SARFT) has fully certified DVStation to receive high-quality digital television signals.

DVStation, the flagship product of the Pixelmetrix Preventive Monitoring line, has the power and flexibility to track thousands of parameters within hundreds of television signals. It can simultaneously monitor the global health of a digital network on multiple layers.

Under tough circumspection of the examining parties from the SARFT Test Center in China, DVStation has proved to be of world class quality. Tested against SARFT's demanding functional requirements and verification methodology for CATV, satellite, and security monitoring equipment, DVStation has been found to fully comply.

"At Pixelmetrix we believe in providing reliable products and services which provide long lasting value to our customers. We are very pleased to receive this recommendation." said Danny Wilson, President & CEO of Pixelmetrix Corporation

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVShift, DVShift-HD, and DVStor.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+, and Télédiffusion de France.

Pixelmetrix is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, winner of the STAR 2000 and 2004 Superior Technology Award from TV Technology Magazine, recipient of a Cable-Satellite/Mediicast Product of the Year Award in 2003 and 2004, and winner of Broadcast Engineering magazine's Pick Hit Award 2005.
