For Immediate Release

Pixelmetrix releases VISUALmpegPRO

November 9, 2006 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, introduced VISUALmpegPRO, integrating its VISUALmpeg Elementary Stream and Video Quality analyzers, to boost consistency in data verification.

The VISUALmpegPRO allows for visual inspection of all aspects of MPEG video coding right from bit rate to macroblock motion vector analysis. Attributes of the VISUALmpegPRO include Quantizer Values, Picture Frequencies, MPEG Artifacts, Frame Quality Index, DCT Coefficients and Error Logger. It supports detailed analysis of MPEG-1, MPEG-2 and MPEG-4 Part 10 video, presenting an ideal R&D system for MPEG experts.

The VISUALmpegPRO provides several measures for video quality and covers the detection of a broad range of video distortion and quality degradation. An advanced feature of this analyzer is the MOS (Mean Opinion Score) rating. This scoring system provides a correlation between a displayed frame and its corresponding quality.

Danny Wilson, President and CEO of Pixelmetrix Corporation remarked, "Pixelmetrix VISUALmpegPRO serves to step up testing of MPEG-based advanced coding. Upgrading to this flexible software application offers customers optimum screening, coherent auditing of video content and methodical analysis of video compression."

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutera, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France.

Pixelmetrix has been conferred the Peter Wayne Award for Best Design and Innovation IBC 2000, the STAR 2000 and 2004 Superior Technology Awards from TV Technology Magazine, Cable-Satellite/Mediacast Product of the Year Awards 2003 and 2004, Broadcast Engineering publication Pick Hit Award 2005 as well as the BIRTV Product of the Year Award 2006.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVStor, DVStorIP, DVStorIP-Gen, DVShift, DPI Auditor and VISUALmpeg are trademarks of Pixelmetrix Corporation.
